

FLIGHT ENGINEERING SOLUTIONS

Your aircraft repair ally
aeronautics

General Aviation Fixed Wing

We supply and distribute aeronautical components for general aviation aircraft, guaranteeing availability, certified quality and agile response.

BEECHCRAFT

CESSNA

PIPER AIRCRAFT

Helicopter Rotary wing aviation

*We offer aeronautical components for helicopters,
guaranteeing safety, precision and immediate availability for
critical operations.*

AIRBUS

LEONARDO S.p.A.

BELL TEXTRON

Commercial Aviation and regional – Fixed Wing

We support commercial operations by supplying critical components for regional aircraft, optimizing lead times and reducing operational risks.

ATR

EMBRAER

BOEING

Commercial Aviation and Large Scale – Fixed Wing

We connect your operation with solutions for large-capacity aircraft, meeting international quality and certification standards.

CASA

AIRBUS

Helicopter Rotary wing aviation

Extended coverage for rotary-wing fleets, ensuring operational continuity in different environments.

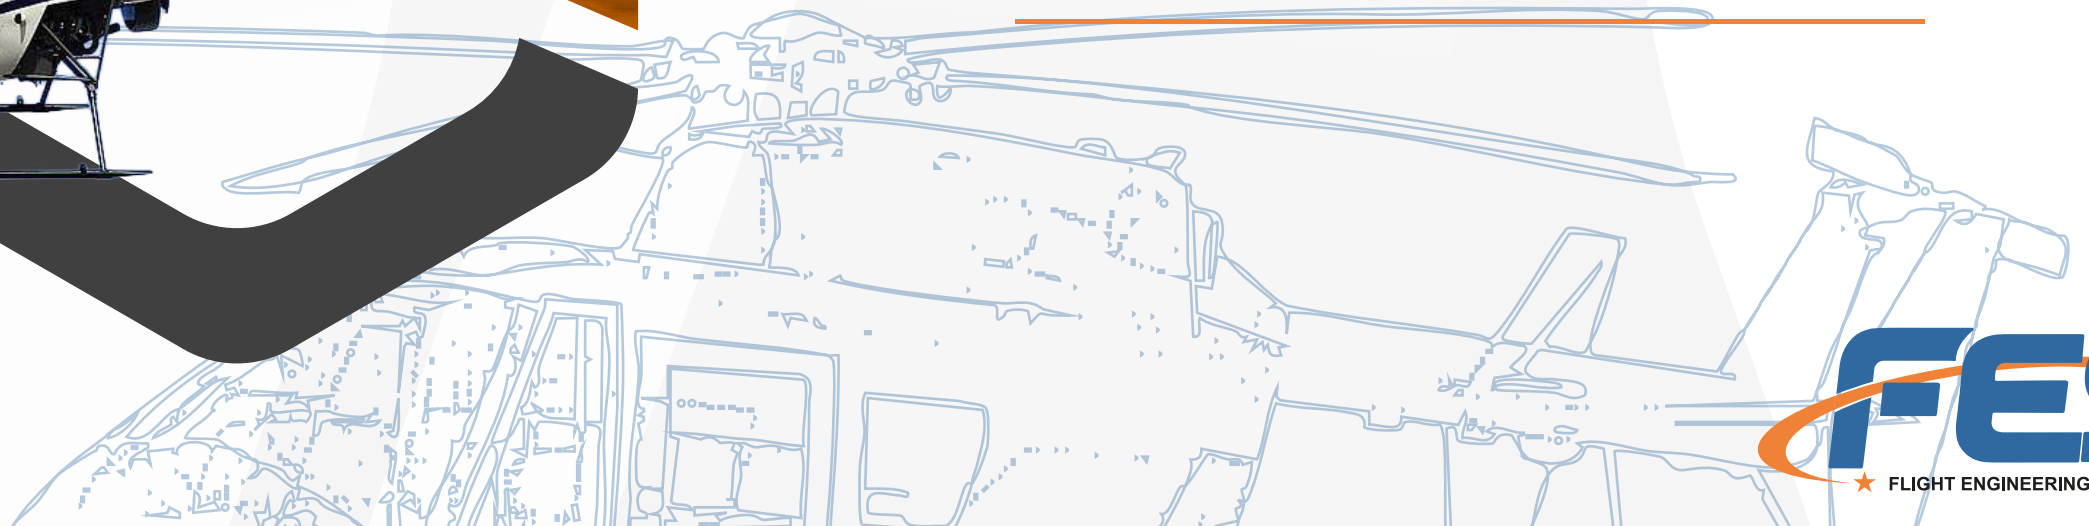

ENSTROM

BÖLKOW

ROBINSON

At Flight Engineering Solutions
We integrate solutions that
optimize your operation

Supply of components

We guarantee access to certified aeronautical components through a reliable network of international suppliers.

Our approach is based on precision, traceability and regulatory compliance, ensuring that every part meets the standards required by the aerospace industry.

Efficient logistics

We have a strategic collection point in Doral(Miami), which allows us to centralize, consolidate and dispatch components quickly to Latin America and the Caribbean.

This logistics hub acts as an operational accelerator, optimizing delivery times and facilitating the management of international shipments.

Global network of suppliers

We work with an international network of certified partners, which allows us to find solutions even in complex or high-urgency (AOG) scenarios.

Our global coverage gives us access to multiple options, ensuring availability and competitiveness in every operation.

Quick response

We understand that time is critical in aviation. That's why our processes are designed to provide fast service, immediate management, and timely solutions.

From request to delivery, we prioritize speed without compromising quality.

*We don't just supply components...
We optimize the entire operation
behind your aircraft*
